

AiRISTA FLOW

Asset Tracking & Management System Real-Time Location Insights of High Value Hospital Equipment

AiRISTA Flow Asset Tacking Solution provides staff with the exact location of valuable hospital assets. Our unique system provides whole hospital visibility into utilization and location, eliminating delays in patient care.

Challenge

Lack of insight into the location and utilization of assets leads to lost revenues, reduced profits, and may increase patient and staff safety risks. Hundreds of hours are spent searching for hospital assets that are lost, stolen or misplaced. This often results in poor utilization, unnecessary rentals and purchases, and life-threatening delays in patient care as caregivers wait for what they need.

Solution

For a solution to be effective, it must have:

- ✓ Whole hospital visibility
- ✓ Remote Programming
- ✓ Wi-Fi, BLE & RFID options
- ✓ Long lasting battery life
- ✓ Locate “nearest” asset
- ✓ Provide par level accounting

AiRISTA Flow Unified Vision Solution (UVS) software platform provides track and trace capabilities, as well as business process automation, to offer healthcare clients the most comprehensive enterprise-grade asset tracking solution in the marketplace

Result

AiRISTA Flow Asset Tracking Solution empowers healthcare providers to not only identify location, but also map and trace the real-time movement of all tagged equipment and improve asset utilization by tracking assets with Wi-Fi RFID asset tags. Scheduling routine maintenance, enforcing policies and procedures, and streamlining many time consuming and error-prone processes are among the solution’s features and benefits.

ASSET TRACKING SOLUTIONS

HEALTHCARE

How it Works

AiRISTA Flow's wide range of asset tags communicate with the AiRISTA Flow Unified Vision Solution software platform. Simply tag each asset you want to monitor, and your staff has immediate access to asset location and utilization in real time.

Capture and analyze data about how assets are being used—and apply those insights to make better in-the-moment decisions and long term improvements. Extend visibility and deepen understanding of equipment distribution, utilization and allocation.

AiRISTA Flow offers more variety of asset tags than any other RTLS solution.

Tags come in a variety of sizes, styles, ways to attach them and connectivity options. The AiRISTA Flow Asset Tracking Solution alerts you when maintenance is needed on equipment and the tag itself.

We customize your solution based on your existing network and requirements. The solution often pays for itself in less than a year.

Other Healthcare Solutions

- Hand Hygiene Compliance
- Staff Workflow
- Temperature and Humidity Monitoring
- Patient Flow Optimization

WHY AiRISTA FLOW

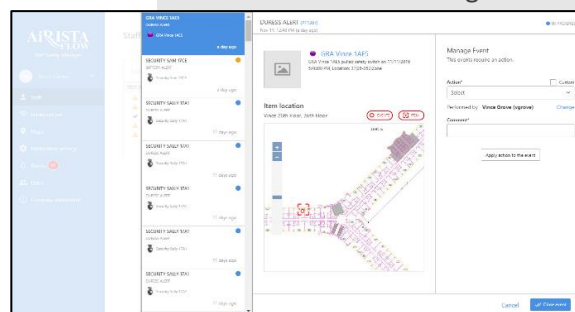

Experts in wireless RTLS for over 10 years, AiRISTA Flow understands elegant solutions.

AiRISTA Flow was awarded #1 vendor in Gartner's Magic Quadrant for BOTH "vision" AND "execution" among RTLS Challengers (2019).

SOLUTION BENEFITS

- Leverage the investment in your WiFi infrastructure
- Improved patient care by ensuring critical equipment is available and maintained.
- Increase caregiver efficiency by eliminating the stress of searching for a needed device and the hoarding that often results.
- Slash search times to as little as 2 minutes
- Cost saving by helping to reduce purchases and optimize your rental program. Use shrinkage control to achieve annual savings
- Total visibility into where and how each asset is used
- Optimize asset workflow and achieve real-time par level visibility and more efficient asset management.
