Virtual Assistants: Voice-enabling UVS To Help Find Resources Faster

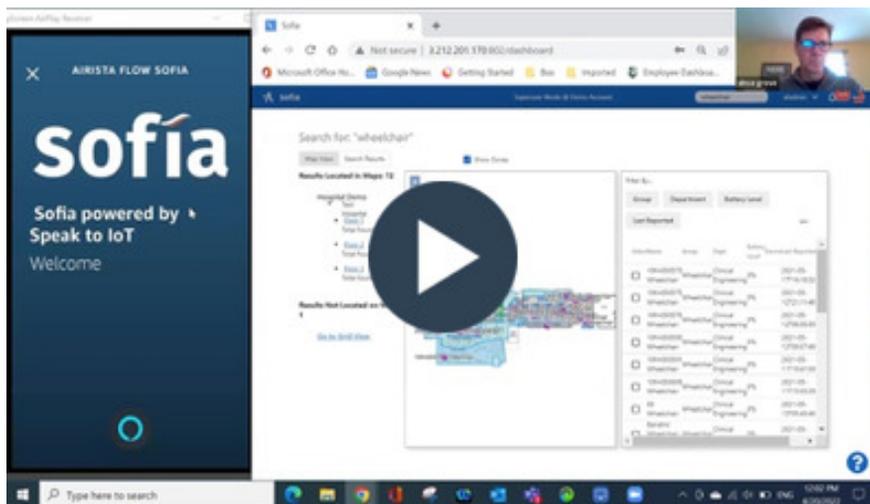

[AiRISTA](#) and our ecosystem partner Speak to IOT (S2I) have created an [integration](#) that uses a voice based Virtual Assistant for the [Unified Vision Solution](#) (UVS) platform. Users are now able to speak into their smart phone to interact with the RTLS platform. The demo uses several commands most useful for busy staff.

- "How many wheelchairs are on the floor?"
- "Where is the nearest wheelchair?"
- "Where is the bariatric wheelchair?"

The phone provides a voice response and a floorplan served up from UVS with the location of the requested resource using S2I's natural language processing engine.

According to Gartner, by 2025, 40% of advanced virtual assistants will be skilled, domain-specific XVAS based on customized language models, up from less than 5% in 2021.

Introducing New Customer/Partner Portal

Online Sales/Service Tools

Automates frequent sales/tech interactions

These portals will allow customers and partners to view and interact with Quotations, Sales Orders, Invoices, Projects & Tasks, Help Desk Tickets, Agreements with Airista Flow, and Subscriptions. Access all of your current statuses in real-time.

- Place hardware purchase orders
- Pay invoices online
- View financial status (credits, holds, etc.)
- Role based access: admin, financial, technical
- July 1 2022 launch date
- **Contact your sales rep with a list of users and their required access level**

National Nurses Week: The Winners & Losers

Nurses are also posting to social media on their last day of employment before leaving for a new field. The most common reason to leave is the ever-increasing [patient ratio](#).

On the heels of National Nurses Week, many thought it was humorous to post to social media the tokens of appreciation.

- Pizza for lunch (“one slice per person please”)
- Beach towel (“not very absorbent”)
- Food trucks (“that we have to pay for”)
- Badge reels (“it said Proud NICU Nurse, but we work in assisted living”)
- White paper bag with chips (“gross”)
- Nothing (“we are not allowed to call it Nurses Week. We call it Hospital Week”)

There was one social media post about a Nurses Week gift that was uniformly applauded. This hospital set up a room with massage chairs and free massages, including aroma therapy. This post got lots of “likes”.
