## Location. Insight. Visibility.

March Newsletter

Virtual Reality Hospital Tour

Virtual Reality Brings Common Healthcare Workflows to Life with RTLS Insights.

The AiRISTA sofia RTLS platform helps orchestrate hospital workflows with location insights and notifications to patients, staff and recourses. Take a self-guided tour through a virtual hospital and explore the ways RTLS location insights drive capacity management and improve the patient experience.

Experience the VR Tour from your Browsers

RTLS-enabled workflows provide a safe and efficient patient experience from admissions, to examination, to boarding, and ultimately services and discharge. Take a tour through this virtual environment which reveals the benefits the sofia platform brings to common hospital workflows.

- Asset Tracking

- Patient Flow
- Bed Management
- Staff Safety
- Hand Hygiene
- Temperature monitoring

Healthcare Workflows Empowered with RTLS Insights

The HIMSS Global Health Conference & Exhibition will be held at the **Orange County Convention Center, Orlando March 11-15**. This is the can't-miss health information and technology event of the year, where professionals throughout the global health ecosystem connect for education, innovation and collaboration.

Visit us at booth **#4351**. Schedule time **here** to meet with the leadership team to discuss your organization's goals.

See the latest in,

- RTLS-enabled workflows extract more value from your RTLS platform and associated apps. Experience common workflows in a virtual reality environment projected on a large video wall.
- Lower the bar for the integration of applications into common workflows via AiRSITA's Flow Studio low-code design environment.
- Demonstration of BLE 5.1 which can track sub-meter accuracy in near real time. BLE 5.1 can also track in the vertical dimension. The interactive demo is sure to draw a crowd.

Scan your badge for a chance to win Meta Quest 3 VR goggles, or an Echo Dot speaker.
