

AiRISTA Digest: July Edition

Recognized in Gartner's 2025 Market Guide for Indoor Location Services

We're proud to share that AiRISTA has been named in Gartner's 2025 Market Guide for Indoor Location Services. We believe being included in this respected report by Gartner reinforces our commitment to delivering scalable, accurate, and impactful RTLS solutions across healthcare and enterprise environments. Whether it's enhancing staff safety, streamlining patient flow, or improving asset management, we're proud to help organizations harness the power of location intelligence to solve real-world challenges.

Thank you to our customers, partners, and the entire AiRISTA team for helping us achieve this milestone!

AAMI Exchange 2025 Recap: Asset Tracking Takes Center Stage

AAMI eXchange 2025 was an incredible experience! We connected with healthcare leaders from across North America, including:

- Teams focused on modernization and clinical efficiency
- Clinical engineering & biomed directors
- Healthcare professionals from Canada

- Leading pediatric hospitals

A common theme? **Asset tracking is a top priority.** Hospitals are looking to reduce the time staff spend searching for equipment—so they can stay focused on patient care.

“2025 AAMI wasn’t just a showcase—it was a powerful networking opportunity to meet the right people, hear their challenges, and explore how RTLS can help.”

— **Ahmad Sajadi, VP of Sales**

If we didn’t get a chance to connect at AAMI, let’s start the conversation:

AiRISTA's Tip of the Month

Use RTLS alert histories to drive process improvement. Don’t let your alerts go unnoticed after resolution. Regularly reviewing RTLS alert histories—especially duress and equipment-related events—can reveal patterns and hotspots that may indicate larger process gaps or safety risks.

Pro tip: Look for repeat alerts in the same area or involving the same asset types. This can help prioritize staff training, reallocate equipment, or prompt workflow redesigns before issues escalate.

Improve Hospital Throughput & Patient Flow

Improving patient flow doesn’t always require more staff or beds. Discover how AiRISTA’s RTLS helps:

- Pinpoint bottlenecks
- Optimize room turnover

- Reduce wait times

The Ultimate Guide to Hospital Refrigerator Temperature Monitoring

Temperature-sensitive assets like vaccines and blood products have strict compliance regulations. In this guide, we explore how RTLS streamlines:

- Real-time monitoring
- Automated documentation
- Alert-driven response
