

AiRISTA Digest: June Edition

Meet Us This Month at AAMI

Conference: AAMI Exchange

Dates: June 20-23

Location: New Orleans, LA

About: AAMI Exchange is a leading event for healthcare technology management professionals, bringing together experts in biomedical engineering, IT, and clinical operations. AiRISTA is proud to showcase how our RTLS solutions support staff safety, asset visibility, and smarter workflows—helping hospitals meet the demands of modern care environments.

Connect with AiRISTA in person and experience how real-time location intelligence is solving today's toughest healthcare challenges. If you'd like to schedule a time to meet with AiRISTA,  **Contact us at** salesinfo@airista.com.

AiRISTA + BD Alaris Integration in Hospitals

We're excited to announce an upcoming press release highlighting AiRISTA's integration with BD Alaris—a powerful collaboration aimed at enhancing visibility, safety, and efficiency in IV pump management.

"As an experienced critical care clinician, I'm ecstatic to see a long-standing challenge in patient care finally addressed. Line of sight to infusion pump alerts isn't a luxury - it's a necessity. Thanks to AiRISTA and BD Alaris, clinicians now have real-time, location-based, notifications to take action when it matters most."

- Nancy Stefano-Foglio, RN, BSN

Stay tuned for the full story, including how real-time location data is streamlining workflows and supporting better patient care across one of the nation's largest public health systems.

Improve Patient Flow Without Adding Staff or Beds

Is your hospital struggling with bottlenecks, long wait times, or underused resources? RTLS can help. Learn how hospitals are using AiRISTA's RTLS to uncover workflow inefficiencies, monitor room turnover, and reduce patient delays—all without major process overhauls.

Better flow, better care, better outcomes. [Read the article →](#)

AiRISTA's Tip of the Month

Tip: Use Sofia's alert history to identify hotspots where duress events frequently occur—then review workflows or staffing patterns in those areas to make decisions that impact operational efficiency!
